* PRICE FOR BASIC MILK I.E., PRICE PAID FOR MILK USED IN FLUID FORM FOR CITY DISTRIBUTION.

+ OR - INDICATES A CHANGE IN DEALERS' BUYING OR SELLING PRICES FROM PREVIOUS MONTH.

JANUARY MILK MARKETS STEADY - PRODUCTION HEAVY

The general tone of fluid milk markets is steady to firm this month (January), although in certain local areas, there are some indications of weakness having developed. This is particularly true of the Boston market, which is operating under the State Milk Control Board. While conditions have been quite unsettled during recent weeks, no official order changing prices has been issued by the Board. Changes in other markets include both advances and declines, the principal city where prices have advanced being Pittsburgh. This area is also under State control, and the January increase on Class I milk is 40¢ per cwt., along with which a retail increase of 1¢ per quart is effective. Johnstown, Pa., prices for Class I milk are 17¢ higher than in December, and Altoona, Pa. prices 13¢ higher. In the South, Miami, Florida which is another market operating under State Control, an increase of 47 cents per cwt. has occurred on Class I milk, and retail prices have also advanced. Smaller Class I increases are reported for a few scattered markets as follows: Santa Barbara, Calif., 18 cents; Lexington, Ky., 10 cents; and Nashua, N.H., 10 cents. A change effective in December at Winona, Minn. places the Class I price 23 cents higher than the price published for December, and in this market a retail price increase of 1 cent per quart also occurred at the same time. Class I prices at Paducah, Ky. are unchanged, but retail prices are 1 cent per quart higher than those prevailing last month. Declines of 7¢ and 9¢ per cwt. are reported effective at Champaign, Ill., and Milwaukee, Wis., respectively, with retail prices unchanged at both places. Class I milk at Akron, Ohio is shown as 35¢ per cwt. lower than in December, but along with this change, prices of two surplus classifications were advanced, so that the effect of the Class I decline on net prices which producers will receive for January milk is lessened.

Conditions of particular importance with respect to fluid milk markets relate principally to supply. The favorable fall and early winter weather has caused a relatively heavy milk production, and a further influence contributing to this situation is a more favorable relationship between milk prices and grain prices. Supplies of dairy products are plentiful, and in excess of quantities on hand a year ago.

FEW MILK PRICE CHANGES IN FEBRUARY

Reports from fluid milk markets show relatively few price changes effective in February. With the exception of Boston, where the unsettled conditions of last month still continue, all changes reported are increases. The largest increase is at Newport, R.I., where by State Milk Control Board order, Class I milk is 40¢ per cwt. higher, and retail prices 1¢ per qt. higher, these changes having been effective since January 16. Class I milk at Newport is now \$3.73, and the retail price of milk delivered to homes is 15¢. Dealers' buying prices have advanced 25¢ per cwt. at El Paso, Texas, with a retail price advance of 1¢ per qt. also having occurred. Other price advances apply only to Class I milk, and include 9¢ per cwt. at Jacksonville, Fla., 10½ to 12¢ per cwt. at Tulsa, Okla., 10¢ per cwt. at Nashville, Tenn., and 1¢ per lb. of butterfat at Seattle, Wash., the two latter changes having taken place the middle of January. Reports from Durham, N.C., indicate that the prevailing retail price is now 15¢ per qt., instead of the January range of 14-15¢. The Boston market is still on an unsettled basis, part of Class I milk being sold at 45¢ per cwt. below the price published a month ago, which was also the case the last half of January. The confusion at Boston has resulted in the Massachusetts Milk Control Board instituting action against agencies which are selling at prices lower than those established by the Board.

MILK MARKETS STEADY IN MARCH - PRICES GENERALLY UNCHANGED

Changes in prices of fluid milk reported for March are limited to a few of the smaller markets. A drop of 1¢ per quart at Ft. Dodge, Iowa, is the only retail price change reported. An advance in dealers' buying prices of Class I milk at Dubuque, Iowa, from \$1.90 to \$2.30 per cwt., was officially approved as of March 1 by an amendment to the Federal milk marketing order in effect there. This higher price was already being followed locally by agreement. This increase was the result of the unfavorable production conditions which have followed last year's drought. At Lexington, Kentucky, where a flat price plan is followed, producers' prices are down 25¢ per cwt. below the February level.

The Boston situation remains unsettled, with dealers' buying prices of milk for city distribution ranging from \$2.37 per cwt. to \$2.82. Considerable quantities of milk

produced in parts of the Boston milk shed, which originally went to city trade, have been diverted to butter and cheese, the production of which products in this area has been running as much as 50 percent greater than a year ago.

Fluid milk markets find some support in the relatively steady tone of manufactured dairy products. Both butter and cheese prices changed very little in February and are now the highest at this time of the year since 1930. Production of manufactured dairy products as a whole, was lighter in January than a year earlier, and more recent current weekly reports show a continuation of this trend.

NUMEROUS CHANGES IN APRIL MILK PRICES

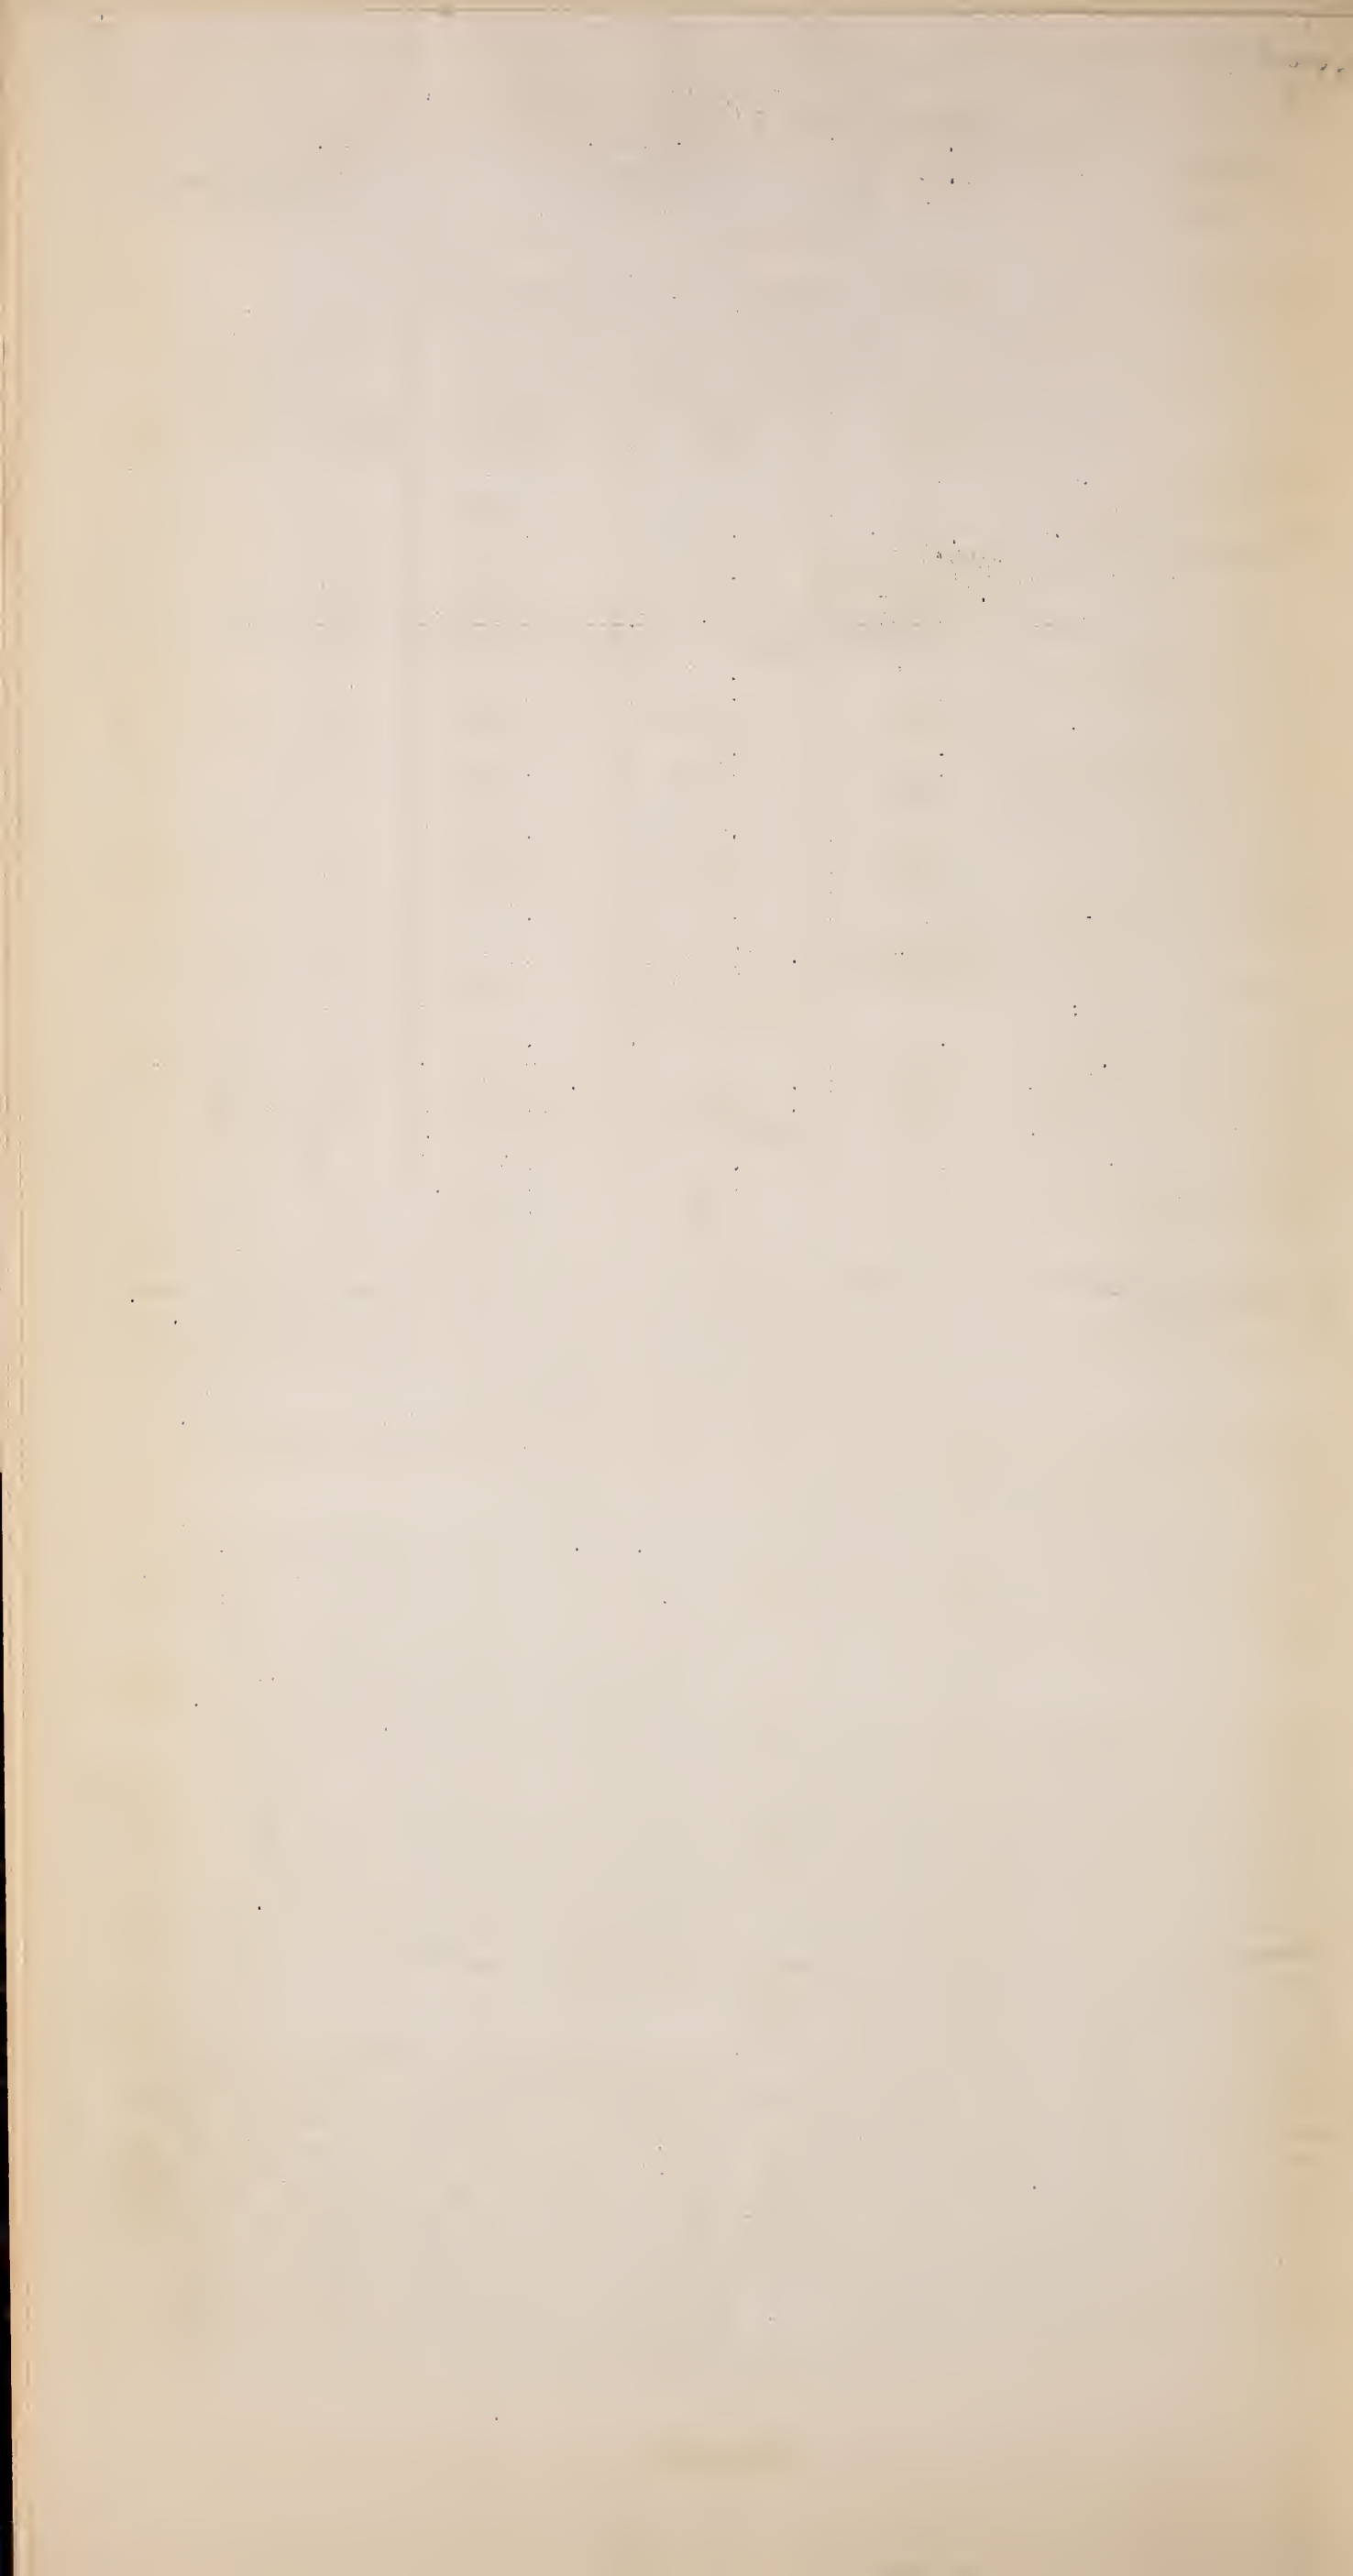

The tone of April fluid milk markets is irregular, according to reports received by the Bureau of Agricultural Economics from city milk distributors and other fluid milk interests. Both increases and decreases of prices are reported, but with the majority of changes in the latter group, and with butter price declines of early April a rather important influence at this time, the general tone of milk markets appears no more than barely steady.

Developments in the Northeastern States during the past month have been of considerable importance to milk producers and dealers serving the large urban centers in that area, with conditions as yet unsettled in certain parts. Discontinuance of price control by the New York State Milk Control Board was followed by changes in wholesale and selling prices in New York City, and temporarily at least, part of the milk for that market is being bought from producers on a flat price basis. The better known brands of milk sold at retail are 1 cent per quart lower than in March and retail prices of cream are also down. Complete reports are not available, and the final outcome with respect to producers' prices and price plans for the market as a whole are not known at the moment. Orders issued by the New Jersey Milk Control Board authorize reductions of 34¢ per cwt. on Class I milk and 1¢ per quart on retail milk, effective April 16. The Boston situation continues more or less the same as a month ago, except for a reported reduction of 17¢ per cwt. in the country plant price in parts of the New England milk shed. There is still a variation in Class I prices at country plants,

as well as F.O.B. Boston, the former being \$1.75 to \$2.03 this month, and the latter, \$2.37 to \$2.82.

Other cities where April prices are lower than in March include the following: Miami, Fla., Class I down 47¢ per cwt., and retail prices 2¢ per quart lower; Manchester, N.H., Class I milk reduced 11¢ per cwt; Knoxville, Tenn., Class I price to be 25¢ per cwt. lower after April 15; Oklahoma City, Okla., Class I lower by 35 to 42¢ per cwt., and retail prices off 1½¢ per quart; Shreveport, La., reductions of 24¢ per cwt. on Class I, and 1¢ per quart on retail sales; and Kansas City, Kans., 22¢ per cwt. lower on Class I milk. Incomplete returns from Tulsa, Okla., indicate a drop of 25¢ per cwt. on a portion of Class I milk, with retail prices to part of the market 2¢ per quart lower than in March. Smaller reductions include drops of 10¢ and 7¢ per cwt. on Class I milk at Quincy, Ill., and San Francisco respectively.

At Detroit, Michigan, however, Class I milk during April will be \$2.68 per cwt., an advance of 20¢, and retail prices have advanced from 12¢ to 13¢ per quart for home delivery. Other Class I increases this month are 15¢ per cwt. at Cumberland, Md., 10¢ per cwt. at Mandan, N.D., and 10¢ per cwt. at Seattle. Flat prices are up 27¢ per cwt. at Klamath Falls, Ore., and retail milk is 1¢ per quart higher. Little Rock, Ark., reports indicate a change for at least part of the supply from a flat price to a classified price plan, and the April Class I price is 49¢ per cwt. higher than the March flat price.

* PRICE FOR BASIC MILK I.E., PRICE PAID FOR MILK USED IN FLUID FORM FOR CITY DISTRIBUTION.

+ OR - INDICATES A CHANGE IN DEALERS' BUYING OR SELLING PRICES FROM PREVIOUS MONTH.

MAY MILK PRICES LOWER IN SCATTERED CITIES

Prices are lower in a number of fluid milk markets this month and two increases only are reported. One of these is a small advance of but 5¢ per cwt. at Pueblo, Colo. The other is at Grand Rapids, Michigan, where the Class I increase of 23¢ per cwt. has, in fact, been effective since April 16, at which time retail prices also advanced 1¢ per quart. At Detroit, Michigan, where a 20¢ increase in Class I milk took place in April, the market is quite unsettled insofar as retail prices are concerned, and a range of 9 to 13¢ per quart exists.

The largest drop in prices this month is at Providence, R.I., Class I milk being 45¢ per cwt. and retail prices 1¢ per quart lower than in April. The Boston market is still unsettled, and no uniform Class I price prevails. Some milk is being bought on a Class I basis of \$2.25¹/₂ per cwt., some at \$2.56¹/₂, and some on a flat basis at a price within this range. In general the May reductions are from 11¹/₂¢ to 25¹/₂¢ per cwt. below April. New York City is also lower this month, and while returns are not complete, a 19¢ per cwt. drop is effective on part of the milk, a 1¢ per quart retail drop has occurred. Albany and Utica, N.Y. are 10¢ per cwt. lower on Class I milk. Louisville, Ky. prices dropped April 16, and are lower than the prices published a month ago, by 33¢ on Class I and 1¢ per quart retail. Springfield, Ill., is another

market where declines have occurred, these amounting to 30¢ per cwt., and 1¢ per quart on Class I and retail milk respectively. Minneapolis and St. Paul prices are not definitely determined for the month, as a new plan there provides for a flexible price depending upon May average prices of 92 score butter at New York. If butter averages 31¢ or lower, Class I milk will be \$2.00. As butter averages higher, Class I prices advance as follows: 32¢, \$2.05; 33¢, \$2.10; 34¢, \$2.15; 35¢ or higher, \$2.20.

Other price declines all apply to Class I milk only, and on a per cwt. basis include: Mandan, N.D., 10¢; Tulsa, Okla., 21¢; Colorado Springs, Colo., 3¢; San Diego, Calif, 7-10¹/₂¢; Seattle, Wash., 14¢; Richmond, Va., 10¢; and Lynn, Mass., 11¢.

Estimates of butter and cheese production show that considerable quantities are being made in some of the eastern fluid milk areas. March butter production in New York was reported as an increase of more than 200 percent over March 1936, and in Vermont and Pennsylvania the amounts were approximately 50 percent greater. March production of American cheese in New York State was estimated at 1¹/₂ million pounds, an increase of 89 percent over a year earlier. Other States where butter production was greater than in 1936, included Wisconsin, Michigan and Ohio. Total U.S. butter production was 1.3% less than in March 1936, and total American type cheese production was 1 percent greater.

JUNE 1937

PRICES FOR JUNE MILK LOWER IN SEVERAL MARKETS

Price declines are effective in June at several important markets, according to reports received by the Bureau of Agricultural Economics. Another drop has occurred at New York City, making the Class I price of that portion of the supply sold on the classification plan 40¢ per cwt. lower at country plants and 42½¢ lower F.O.B. City than in May. The June country plant price in the 201-10 mile zone is \$1.65 per cwt. These prices are approximately 80¢ per cwt. lower than a year ago. Part of the New York City supply is being bought on the flat price plan, and the country plant price under this plan in the 201-10 mile zone is \$1.40 per cwt. Other reported Class I declines in the Northeastern territory are a 10¢ drop at Binghamton, N.Y., and 23¢ per cwt. drop at Lawrence, Mass.

The largest price change for the month is at Richmond, Virginia, where the Class I price is 50¢ per cwt. lower, and retail prices are 1¢ per quart lower than in May. At Detroit, Mich., the retail price situation is reported as still unsettled, although retail price ranges are not so wide as they were in May, particularly on home deliveries. The June price for 3.5 percent milk F.O.B. Detroit, is \$2.48. The Class I price is down 17¢ per cwt. at Louisville, Ky., and a change has been made at Chicago which will likely make producers' net prices for June milk lower than the preceding months. Chicago prices have by agreement been 58¢ per cwt. over condensery prices. By the change, the differential was dropped on May 17 to 50¢.

Other reported price declines include the following: Cedar Rapids, Ia., Class I milk, down 26¢ per cwt., and retail prices 1¢ per quart lower, both effective May 16; Iowa City, Ia., Class I down 10¢ per cwt; Lincoln, Nebr., Class I 7¢ lower; Toledo, Ohio, Class I 5¢ lower; and Dallas, Texas, Class I 20¢ per cwt. lower for part of the supply. Retail competition at St. Joseph, Mo., has resulted in a wide variation of prices, which range from 9 to 11¢ per quart, delivered, and 5 to 11¢ per quart at stores. Because of a change in the allowance for butterfat variation, the calculated price of 3.5 percent milk at Cincinnati this month is 5¢ per cwt. higher than in May, although the base price of 4% milk remains unchanged. The one advance recorded this month is at Cumberland, Maryland, and amounts to a 25¢ per cwt. increase on Class I, and a 1¢ per quart retail advance.
